SUMMARY

Experienced full-stack developer with 4.5 years of expertise in React, Next.js, and Node, having successfully developed and optimized multiple high-traffic web applications. Proficient in Jest for unit testing and dedicated to creating efficient, user-friendly interfaces.

Looking to leverage my full-stack and AI integration skills in building scalable, enterprise-grade SaaS applications with a focus on performance, security, and seamless user experiences.

EXPERIENCE

Software Engineer

Indus Net Technologies Limited

10/2024 - Present Kolkata

- Developed and maintained scalable web applications using React, Next.js, and Node.js.
- Built responsive and accessible UI components with Tailwind CSS and Shadcn UI library.
- Integrated secure payment flows using Cybersource and optimized backend performance with Express.js.
- Implemented efficient data fetching and state management using GraphQL in a microservices architecture.
- Collaborated closely with designers and backend teams to deliver pixel-perfect, high-performance web solutions.

Program Analyst

CBNITS India Pvt Ltd

03/2021 - 09/2024 Kolkata

- Translated wireframes into fully responsive and accessible user interfaces
- Upgraded web applications with Vanilla JavaScript, HTML5, CSS3 for better performance and user experience
- Built dynamic front-end components with React.js, SCSS, and Vite for faster build times and modular architecture
- Integrated user input handling and state management using Redux and Zustand to ensure predictable UI behavior
- Managed source control, code reviews, and team collaboration using GitHub and Azure DevOps

EDUCATION

Masters of Computer Application

Indira Gandhi National Open University

06/2021 - 06/2024 Kolkata, India

- Developed a full-stack fashion e-commerce web application inspired by Myntra using **React** for the frontend and **Node.js** for the backend; **self-hosted the application on Vercel** for deployment and testing.

Bachelor of Computer Application

Techno India University

06/2017 - 06/2020 Kolkata, India

- Built a strong foundation in computer applications with a focus on **web development, databases, and programming fundamentals**.

KEY ACHIEVEMENTS

Optimized Web Application

Implemented SSR and ISR, boosting performance by 30%.

Streamlined Deployment Workflows

Automated CI/CD pipelines reduced deployment time by 50%.

SKILLS

Frontend Technologies

React.js	Next.js	JavaScript	
TypeScript	Vite	SCSS	CSS3
Tailwind CSS	Shadcn	Bootstrap	
Ant Design			

Backend & Full Stack

Node.js	Express.js	Firebase Auth
Firebase Firestore		REST APIs
GraphQL	MongoDB	Docker

Dev & Tools

Git	GitHub	Bitbucket Pipelines	
GitHub Actions		Vercel	Netlify
Jest	React Testing Library		

AI Integration

OpenAI API	ChatGPT	Vercel AI SDK
WebLLM	Prompt Engineering	

Workflow

Agile	Scrum	CI/CD
Dockerized Development		

Third-Party Services & APIs

Cloudflare	Cybersource	Stripe
Webhooks	Google Tag Manager (GTM)	

PROJECTS

Katalyst India - Empowerment Platform for Women's Education and Mentorship

📅 01/2025 - Present

A social impact platform that supports the professional and personal growth of underprivileged yet high-potential young women across India. The platform facilitates mentorship, education programs, and community engagement through a digital portal accessible to students, mentors, and administrators.

- Developed and maintained scalable features for a platform empowering underprivileged women through education and mentorship.
- Increased user engagement through upgrading UI using **React.js**.
- Implemented secure **authentication (JWT)** and role-based access.

Accuride - E-commerce and customer engagement

📅 10/2024 - 05/2025

Developed a website for a global manufacturer, showcasing products, services, and technical resources. The platform features a detailed product catalog with specifications, images, and downloadable resources to enhance user experience.

- Improved user satisfaction by enhancing user experience and website performance on more than 500 products.
- Implemented **Server-Side Rendering (SSR)** and Incremental **Static Regeneration (ISR)** using **Next.js** to boost performance and SEO.

Deeptrail - AI-driven security platform

📅 07/2023 - 09/2024

Developed an AI-driven security platform website that enables users to manage and investigate security alerts efficiently. Users can upload alert. The backend seamlessly processes the investigation and generates detailed reports

- Improved navigation efficiency by developing a UI for non-technical users with real-time alerts.
- Ensured accurate data display, responsive design, and smooth performance while maintaining security and scalability standards.

eZHealth - Healthcare solutions Platform

📅 01/2021 - 06/2023

Developed a healthcare solutions platform focusing on the vaccination module with multiple user roles. The platform allows seamless management of vaccine appointments and status updates for each user role. Integrated real-time payment gateways for secure transactions.

- Improved user experience by integrating **real-time payment gateways** for secure and synchronized transaction processing.
- Created flow for Covid-19 vaccine module for multiple user login [patient, doctor, nurse, admin]

Zuellig pharma Analytics - Data analytics and visualization platform

📅 03/2021 - 12/2021

Developed an analytics platform for tracking pharmaceutical distribution, offering insights, visualizations, and reports on supply chain performance and market trends. It supports data-driven decisions with real-time data integration and ensures accuracy and accessibility.

- Improved data processing accuracy by designing user-friendly interfaces and conducting real-time analysis.
- Enhanced data management efficiency by integrating middleware with **redux-thunk** and storing data with **redux-persist**.
